

Exciting Research Opportunity!!!

San Diego City Schools
Approved for Distribution

Conducted by research scientists at the *School of Speech, Language and Hearing Sciences at SDSU and the Dept. of Psychology at UCSD*

Children ages 5-12 are invited to participate in a language study!! (Children must be native speakers of English)

Your child will receive a number of complimentary **formal speech and language evaluations**, and the results will be made available to you.

During each session your child will be asked to listen to sentences/words/sounds and press a button corresponding to some pictures.

These sessions will be conducted at one of two sites (depending on individual needs), and scheduled at your convenience:

- The Cognitive Neuroscience Laboratory at SDSU on Alvarado Rd.
- OR
- The Language and Cognitive Neurosciences Lab at UCSD in La Jolla
(Travel expenses will be compensated)

This research, approved by SDSU, UCSD and Children's Hospital's Internal Review Boards (SDSU# 1423, UCSD #051013S, CHCC# 11066) will help investigators better understand how children process spoken language.

If you are interested or have any questions, please contact Brianne Bricker (SDSU) at (619) 594-7878, speech@rohan.sdsu.edu or Maxwell Moholy (UCSD) at (858) 822-1649, speech@psy.ucsd.edu
